

Some Algebraic and Analytical Properties of Coquaternion Algebra

Anatoliy A. Pogoruy and Ramón M. Rodríguez-Dagnino

Abstract. The aim of this work is to prove some basic properties of coquaternions and to find the zeros of polynomials involving coquaternionic elements. We also provide some expansions of hyperholomorphic function on coquaternion algebra by using Fueter polynomials.

Mathematics Subject Classification (2000). Primary 37F10; Secondary 32A10.

Keywords. Coquaternion algebra, zeros of quaternionic polynomials, hyperholomorphic function, Fueter polynomials.
